

ALGRA GROUP – 365° SYSTEM MANUFACTURER

INPUT SYSTEMS, CASINGS, ELECTRONICS,
SOFTWARE, ASSEMBLY, ENGINEERING

365°

PRODUCTS AND SERVICES OF THE ALGRA GROUP

'We offer customised input systems, fronts, casings, industrial signs, electronics and device assembly.'

Input systems

- Piezo wireless switch: DYNAPIC® WIRELESS
- Metal touch: DYNAFORCE
- Resistive keypad: DYNASENSE
- PCAP Touchscreen
- Membrane keyboards

Trade products

- Piezoelectric components
- Plastic and injection-moulded parts
- Aluminium die-casted parts
- Input systems – membrane, capacitive, touch with or without backlight etc.

Signs, fronts and casings

- Signs made of aluminium or plastic
- Fronts made of aluminium or plastic
- Discs and dials made of aluminium
- Signs made of steel or brass
- Cases made of aluminium, steel or plastic

Electronics

- Hardware and software development
- Production of electronic circuits and systems

Assembly for devices

- Assembly according lean principles
- Integrated test methods

ALGRA GROUP

Customised input systems, fronts, casings, industrial signs, electronics and device assembly. The right product to meet every requirement. Produced in-house or sourced from qualified suppliers worldwide.

ALGRA

industrial technology

Industrial production of piezo input systems, fronts and industrial signs. Modern production for medium to large volumes. Comprehensive assembly for devices featuring all manner of electronics systems. Innovative products and manufacturing processes thanks to in-house research and development. Systematic, analytic approach.

gravuretec

precision works

Precision work for the production of signs, fronts and casings. Milling, glass bead blasting, polishing, anodising, printing and coating of complex aluminium components.

connect tec

worldwide technologies

Connection between customers and manufacturers worldwide to fulfil sophisticated requirements relating to all manner of input systems and housings. Injection moulding, die-cast aluminium, input systems. Technical solutions with piezoelectric elements.

TRIMADA

electronic systems

Hardware and software development as well as production of electronic circuits and systems. Assembly of devices using electronics, including mechanics, casings and front panels. Implementation of customised solutions thanks to in-house production.
